**TRANSPAK CONTINUES TO EXPAND BUSINESS IN ASIA WITH
ACQUISITION OF SHINHAN EXPORT PACKING OF KOREA**

San Jose, Calif. (February 1, 2009) – TransPak, the worldwide market leader in crating, packaging and logistics and the only company in the industry to specialize in all three services to deliver quality, state-of-the-art, door to door solutions to its manufacturing partners, today announced that it has opened its third international satellite office outside Seoul, Korea through the acquisition of Shinhan Export Packing of Seoul.

“In the past two years we have opened new satellite offices in Shanghai China and Tainan, Taiwan and our new Korean office follows in that success,” said Bert Inch of TransPak. “In this case we acquired an existing crating and packing company which will enable us to scale much faster. Korea has been a long-term leader in the semiconductor industry and as a result, there is a significant presence of manufacturing companies needing crating and packing services. Our current customers continue to expand their global footprint and it’s our intention to provide the same level of service and quality wherever they operate.

By setting up its plant southwest of Kyeong-gi province near Pyeung-Taek port in Korea, TransPak can conveniently service many of the high-tech manufacturers in the Incheon/Ansan/Hwasung industrial Parks.

TransPak has been a key partner to leading technology companies for decades. Founded in 1952, the company is headquartered in California’s Silicon Valley and today provides custom crating, packaging, and logistics support to top companies in the semiconductor, aerospace, medical equipment, security, and solar industries.
