**TRANSPAK EXPANDS BUSINESS
INTO ASIA WITH NEW SHANGHAI OFFICE**

San Jose, Calif. (February 2, 2007) – TransPak, the worldwide market leader in crating, packaging and logistics and the only company in the industry to specialize in all three services to deliver quality, state-of-the-art, door to door solutions to its manufacturing partners, today announced that it has opened its first international satellite office in Shanghai, China.

“As a worldwide market leader, TransPak brings a high-tech, precision approach to crating and logistics to this vital international manufacturing hub,” said Bert Inch of TransPak. “In going where our manufacturing partners are, we are able to provide significant value to our clients, who seek global partners to maintain consistent quality worldwide.”

A booming electronics manufacturing hub and one of the world’s busiest ports, shipping 560 million tons of cargo in 2007¹, Shanghai represents an enormous growth opportunity for TransPak. The offices in Shanghai allow TransPak to work not only with existing U.S. manufacturing partners that have production facilities in the region, but also with third-party contract manufacturers in China. By setting up shop where the company’s manufacturing partners are, TransPak is strategically poised to deliver the highest standard of quality and service in the industry to a multitude of powerhouse technology brands.

TransPak has been a key partner to leading technology companies for decades. Founded in 1952, the company is headquartered in California’s Silicon Valley and today provides custom crating, packaging, and logistics support to top companies in the semiconductor, aerospace, medical equipment, security, and solar industries.
