## Global Supply Chain Management

TransPak's satellite offices in Asia ensure we have locations and manufacturing where our customers need the support. By being where you are, we can help you shorten your global supply chain.

### Shanghai, China

With its presence in Shanghai, TransPak brings a high-tech, precision approach in crating, packing and logistics to this vital international manufacturing hub. We work not only with existing U.S. manufacturing partners that have production facilities in the region, but also with third-party contract manufacturers in China.

### Tainan, Taiwan

Tainan's Science-Based Industrial Park, a key electronics manufacturing region, houses high-tech global manufacturers who partner with TransPak. Streamline your supply chain through Taiwan with our custom made crates and transit cases, as well as our shock-mounted skids and containers.

### Seoul, Korea

Korea's importance in global manufacturing supply chains continues to grow. TransPak scaled up production of crating and packaging capabilities. Located southwest of Kyeong-gi province near Pyeung-Taek port in Korea, TransPak can conveniently service many of the high-tech manufacturers in the Incheon/Ansan/Hwasung Industrial Parks to ensure their supply chain runs smoothly.

### Johor, Malaysia

To meet customer demand, TransPak scaled up production of crating and packaging capabilities in Johor Bahru. These links in critical trade centers ensure TransPak can help you maintain consistent quality in your supply chain worldwide.

TransPak has been a key partner to leading companies for decades, so we understand the global supply chain. Strategically located to support the semiconductor, aerospace, medical equipment, security and solar industries, we know what it means to operate around the world. That's why we have offices in Shanghai, China; Tainan, Taiwan; Seoul, Korea; Johor, Malaysia; and Singapore.

### Singapore

TransPak's presence in this important Southeast Asian Financial and Manufacturing Hub provides the support top blue chip companies require from a first tier supplier. To ensure customers requirements can be easily met, TransPak's Singapore facility even includes a heat treatment center which speeds the production process so your manufactured goods are protected during transportation.

### Benefit from Global Packaging, Crating and Logistics Solutions

Our global operations demonstrate TransPak's deep commitment to meeting our customer needs. Global supply chains require worldwide consistent quality and TransPak delivers with crating, packaging and logistics services available in critical manufacturing hubs – Shanghai, Tainan, Seoul and Singapore.
