

Custom Crating Design & Production

TransPak has been an industry leader in designing and building crates for over 55 years. With our proprietary CrateMaker® software, our dedicated, experienced team can quickly produce crates at a multitude of strategic locations worldwide.

Building Crates for Over 55 Years

With every crate that TransPak builds, you are tapping into hundreds of years of experience, reaping the benefits of superior materials, and leveraging both industry-leading and proprietary techniques – all put in motion to meet your exact specifications. Each TransPak crate is fabricated with detailed attention to the stability, dimensions and structure. This way we ensure that you get the best crate for your needs.

Proprietary Cratemaker® Software

Only TransPak offers the speed and flexibility of CrateMaker, our proprietary design software. Working alongside AutoCAD, CrateMaker takes your equipment specifications and develops the most efficient and cost-effective crating solution possible.

TransPak tightly controls crate production to ensure quality. Willing to pack at our location or yours, TransPak builds each crate from only the best raw materials and ensures all specifications are met exactly.

Economies of Scale in Materials Cost

With TransPak, you are tapping into the resources of one of the world's largest crating solution providers. Our buying power enables us to purchase high-quality materials at competitive rates. This

The TransPak fabrication team has more than 200 years combined experience. TransPak designs and produces unique crating solutions – often in just a single day. TransPak specializes in producing every type of crate, including wood, steel and plastic. We build our designs to your strictest specifications using top quality materials to ensure a superior crate that safeguards your shipments.

creates cost and differentiation advantages that translate into savings for you.

We believe in green production, so we focus on developing crates that can be recycled at the end of the useful product life. We also refurbish crates so that you can leverage the economies of scale that comes with reusing crates multiple times. You save time making the crates, reduce cost, and minimize waste. All this translates to savings which are passed on to you.

Quick Turn Around Minimizes Cycle Times

TransPak's design and production specialist turn a process that can take up to a week into one we can perform in a day. Once constructed, all of our crating meets domestic and international government code requirements, so your products or equipment will move swiftly and safely through the transportation process.
