

RIGGING & HOISTING

Premier Rigging & Material Handling

TransPak understands that when it comes to rigging, experience counts. Our staff has over 60 cumulative years of experience moving all types of equipment. With this kind of experience, we know how to adapt as the industry needs change. Our focus on meeting each customer's specific challenges with unique rigging and hoisting solutions means that you can count on us.

Experienced Resources & Quality Service

With all we do for our customers, we understand firsthand how important it is to protect equipment and property from damage, personnel from injury and the environment from harm. At TransPak, we actively take responsibility to understand published hoisting and rigging requirements and apply them to work for you. We know all about sling selection, use and inspection as well as safe lifting practices. That's why you can depend on us to move, rig, hoist and install any type of CNC machinery, semiconductor tooling, or heavy equipment. In fact, we can perform jobs involving all types of large and heavy items.

Quality Rig, Hoist & Install Services

TransPak can receive and warehouse any type of tool in our 80,000 square foot Austin warehouse. We then provide delivery and installation to your site whenever you're ready. The TransPak fleet of truck and forklifts can load or unload at our warehouse or on your site to fit your time requirements. Our riggers can assist with every heavy crating or skidding need anywhere in the Central Texas area. We have forklifts up to 36,000 pound capacity and the truck to take them anywhere they are needed.

Based in Austin, Texas, TransPak's Rigging & Hoisting operation can move one tool or relocate your entire shop. You benefit from high quality, reasonable prices and unequaled care on every job we do. And the jobs we do are not just limited to rigging and hoisting. In fact, TransPak can help you streamline your entire supply chain with custom crating, packaging and logistics solutions worldwide.

One Stop Shopping

Added to our rigging and hoisting capabilities, our experienced crating design and manufacturing solutions, packaging and protection systems, and global logistics capabilities mean our customers can trust us to get the entire job done. Among others, we service machine shops, semiconductor factories, injection and blow molding facilities, solar panel manufacturers, and sheet metal fabricators. It's our goal to deliver efficient, practical solutions that best serve your needs.

Value Added

TransPak consistently exceeds customer expectations by providing exceptional rigging, hoisting and installation services. We carefully review your needs to ensure that the customer solution we design is tailor-made to fit your needs. Let us show you how we can save you time and money while crating, moving, and installing your equipment.
